

Window 1: Is not Georgian pane and therefore does not match the style of all other windows in the house. We propose changing this window to four panes per side.

French doors 3: As these doors were replaced more recently than the windows, the style does not match any of the windows.

Window 5: Glass is broken and frame is warped so that window does not close tightly.

Window 8: Both inside and outside of the frame are heavily rotten and soft to the touch.
