Vertical Sliding Sash Windows

These PVCu vertical sliding sash windows have been designed to maintain the elegant proportions of traditional sash windows, whilst incorporating the very best of modern day technology.

They feature tilting upper and lower sashes for ease of cleaning, low line beads and gaskets for improved sight lines, energy efficient glass to reduce heating bills, and naturally they are quality assured.

From a terraced house to a stately home, these PVCu sliding sash windows will ensure that a property retains its character and charm.

Just some of the key features:

- Sculptured Georgian bars
- Traditional run through sash horns
- Both sashes slide
- A choice of hardware
- High quality balances

Energy efficient and environmentally friendly – our vertical sliders are “A” energy rated as standard, and are manufactured from lead-free profiles. The windows also have brush seals around the openings for excellent draught proofing.

The finishing touch – every window is manufactured to order, so you can choose from a wide range of colours and hardware options.

Gold Sash Lift

Chrome Tilt Knob

Satin Chrome Lock

Run Through Sash Horns
