

Chequers

Exterior Narrative

A minimal external refurbishment is proposed to enhance accessibility and refresh the building's appearance while preserving its original character.

A new slatted concrete access path is to be introduced to the right-hand side of the main entrance steps, providing improved accessibility for elderly and less mobile users entering the restaurant.

The remainder of the external envelope will undergo a light-touch refurbishment, including cleaning and repainting of all existing surfaces to reinstate a well-maintained, cohesive appearance in keeping with the building's existing aesthetic.

The existing projecting sign located on the left-hand elevation will be removed and replaced with a revised signage element.

In addition, two bespoke brass signs featuring the new logo will be fabricated and installed—one to the principal front elevation and one to the side elevation—positioned to enhance visibility and reinforce brand identity.

Detailed drawings and visual mock-ups are included within this submission to illustrate the proposed interventions.

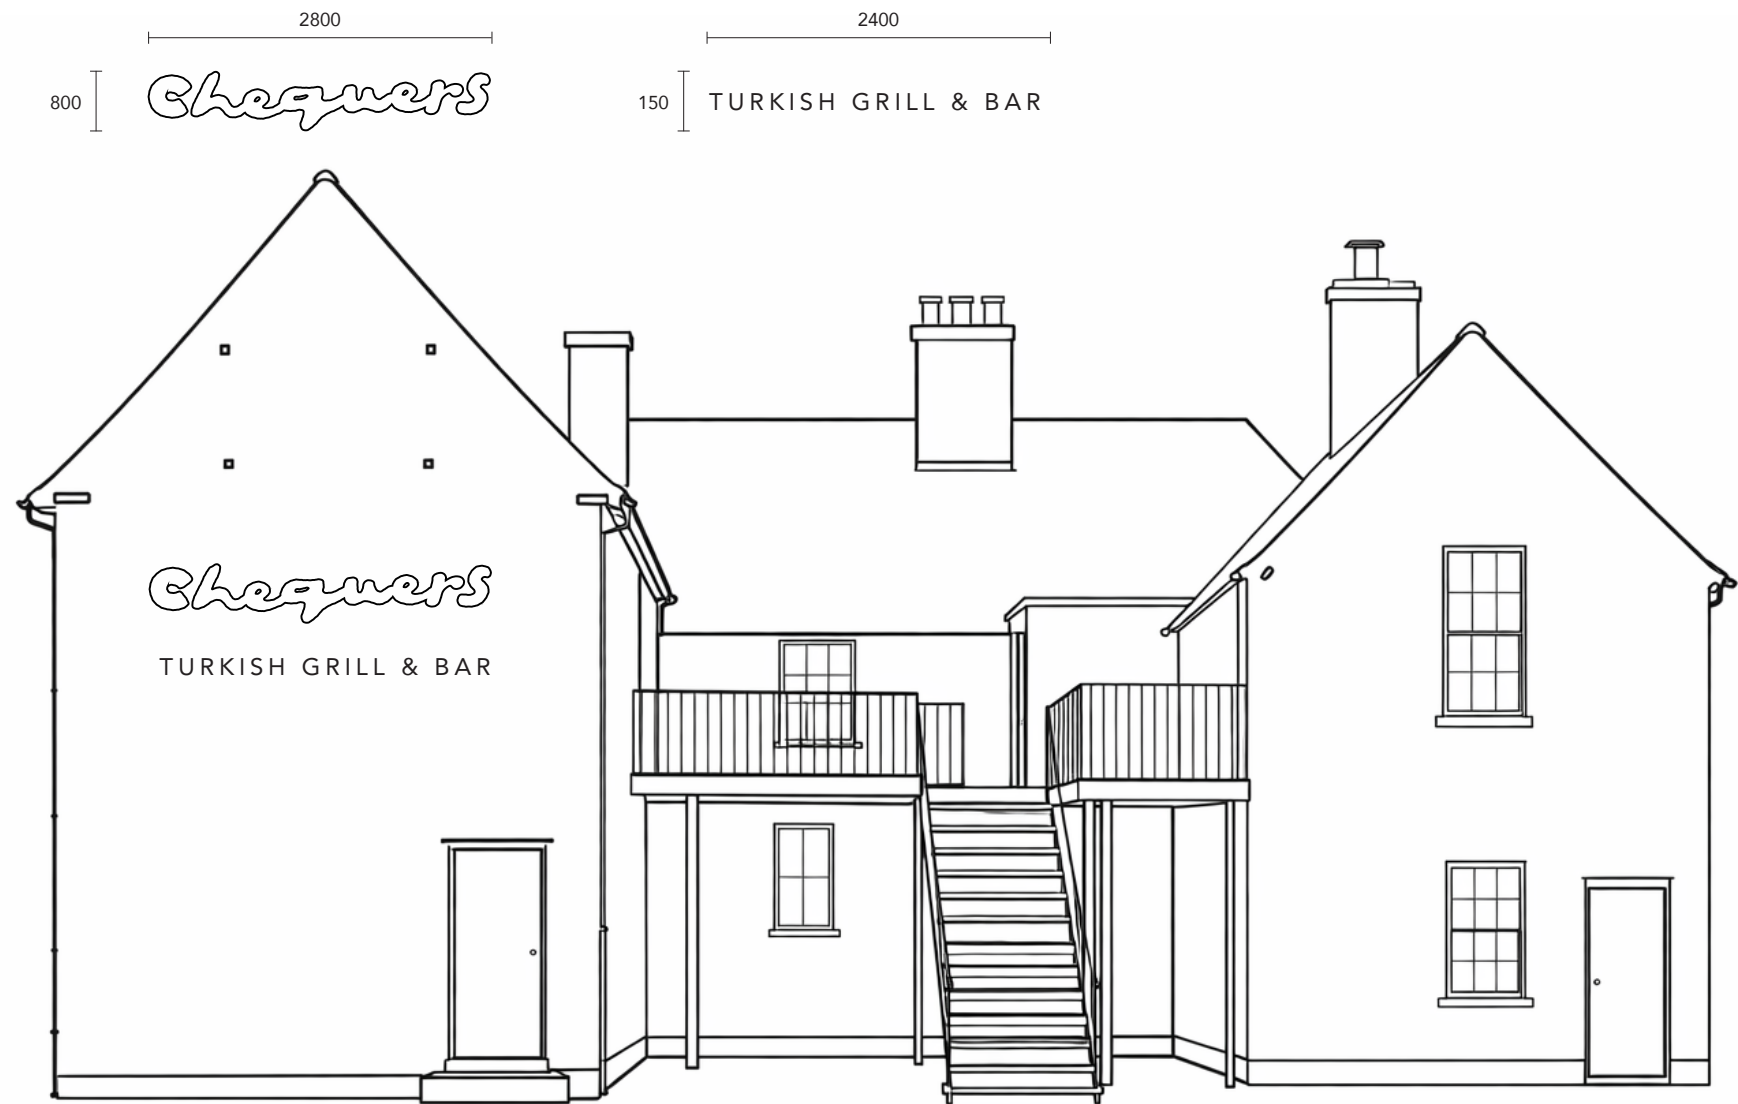

Built up brass colour logo sign 2800 mm wide x 800 mm high x 60 mm depth

The proposed 'Chequers' script signage is anticipated to measure approximately 2800 mm wide × 800 mm high,

subject to final setting-out on site and coordination with the existing fenestration proportions.

Projecting sign panel:
800 mm (w) × 900 mm (h)

The proposed 'Chequers' script signage is anticipated to measure approximately 2800 mm wide × 800 mm high,
