

Planning Application 26/00018/FPH

Barkway Parish Council wish to object to application **Planning Application 26/00018/FPH**.

This is a substantial size for a shed at 15 square metres and could be seen as excessive and a great impact on neighbouring properties and the conservation area. Look at google earth there appears to have been no buildings in this location however there was a structure nearby in 2008

Size

The plans that have been submitted are for a shed that is 15 square metres this over the permissible square meterage of a building that is more than 20 metres away from any walls of the main building. With the distance from the main building the maximum square meterage is 10 sq metres

Location

The proposed location of the shed is close to adjoining properties and is over 20 metres away from the applications property. However these is no height indication on the plans to ensure it does not exceed 2.5 metres in height.

There are already various outbuildings on the property which possibly could be utilised rather than adding additional buildings into the Conservation area.
