

Details of Condition : Details reserved by Condition 2 (Joinery detail drawings) of listed building consent reference 26/00525/LBC granted on 27.05.2026.

With exception of the steel windows to the extension and the steel doors to the Southeast Elevation, all new windows shall be manufactured in timber with flush casements where openable and no trickle vents. Section details thereof shall be submitted to and approved in writing by the Local Planning Authority prior to their manufacture including 1:1 section of glazing bars and glazing system. Thereafter the new windows shall be installed in accordance with the approved details.

When Conservation supports the use of slimlite glazing it is precisely the type of section detailing provided on the drawings below that I would hope to see i.e. Flush casements, good profiles to astragals and incorporating a 14mm system.

I have no hesitation supporting this proposal. It just makes decision making that much more straightforward when applicant/architect/contractor/LPA are on the same page.

- VERTICAL SECTION DETAIL - 24mm OVOLO TRUE GLAZING BAR
- VERTICAL SECTION DETAIL - PLANT ON CILL EXTENSION OPTIONS
- SINGLE OPENING HORIZONTAL SECTION DETAIL
- TRIPLE OPENING HORIZONTAL SECTION DETAIL
- VERTICAL SECTION DETAIL - TOP AND BOTTOM RAIL
