6. Tree Preservation Order Details

If you know which TPO protects the tree(s) enter its title or number below

7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).
Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.
E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

Due to the damage the cedar tree sustained in the snow it has left the tree somewhat lopsided and also has a large main stem with a large amount of damage to the heartwood and would like to remove the stem as it is going to be very weak if new growth was to grow from it and has lost most of the limbs on the stem in question also to remove a low lateral branch that goes over the top of the headstones as it is will eventually start to cause issues with the headstones and also stops anyone tending to the graves.
I would also like to carry out some selective tip reduction to the tree to alleviate weight bear on some branches. and also to crown lift the tree to 3m to allow public to walk around the tree with out the lower branches being of risk of catching public in the face as a lot of the public would be slightly older and a little more frail.
And also clear any snapped/hanging limbs that are found during climbing of the tree as sometimes a ground assessment would not spot due to location.
All works will be carried out by fully qualified arborists following BS and as a company we have full insurance and are also arb approved.

8. Trees - Additional Information

For all trees
A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.

For works to trees covered by a TPO
Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application must be accompanied by the necessary evidence to support your proposals. (See guidance notes for further details)

1. **Condition of the tree(s)** - e.g. it is diseased or you have fears that it might break or fall:
   If YES, you are required to provide written arboricultural advice or other diagnostic information from an appropriate expert. ◉ Yes ○ No

2. **Alleged damage to property** - e.g. subsidence or damage to drains or drives. ○ Yes ◉ No
   If YES, you are required to provide for:

   Subsidence
   A report by an engineer or surveyor, to include a description of damage, vegetation, monitoring data, soil, roots and repair proposals. Also a report from an arboriculturist to support the tree work proposals.
