Dear Vicki Wood,

Location: 5 Cambridge Road Barley Royston Hertfordshire SG8 8H
Proposal: Erection of self-build dwelling with Juliet balcony, solar panels, and access steps following demolition of existing dwelling and outbuildings. Hard landscaping to include creation of no.2 parking spaces to front elevation. Installation of bin storage.
Application Number: 26/01727/FP

I write with regards to the above, to provide a response on behalf of the county council as the Waste Planning Authority.

Government policy seeks to ensure that all planning authorities take responsibility for waste management. This is reflected in the County Council's adopted waste Development Plan Documents (DPDs). In particular, these documents seek to promote the sustainable management of waste in the county and encourage Local Planning Authorities to have regard to the potential for minimising waste generated by development.

The National Planning Policy for Waste (October 2014) sets out the following:

'When determining planning applications for non-waste development, local planning authorities should, to the extent appropriate to their responsibilities, ensure that:

- the likely impact of proposed, non- waste related development on existing waste management facilities, and on sites and areas allocated for waste management, is acceptable and does not prejudice the implementation of the waste hierarchy and/or the efficient operation of such facilities;*

- *new, non-waste development makes sufficient provision for waste management and promotes good design to secure the integration of waste management facilities with the rest of the development and, in less developed areas, with the local landscape. This includes providing adequate storage facilities at residential premises, for example by ensuring that there is sufficient and discrete provision for bins, to facilitate a high quality, comprehensive and frequent household collection service;*
- *the handling of waste arising from the construction and operation of development maximises reuse/recovery opportunities, and minimises off-site disposal.'*

The supporting documents to this application make no reference to the adopted Waste Core Strategy and Development Management Policies DPD (2012). The policies in the adopted DPD (2012) that relate to this proposal, and which must be considered by the Local Planning Authority in determining the application, include Policy 1: Strategy for the Provision for Waste Management Facilities (namely the penultimate paragraph of the policy) and Policy 12: Sustainable Design, and Demolition.

Many of the policy requirements can be met through the imposition of planning conditions.

As a general point, built development should have regard to the overall infrastructure required to support it, including where appropriate a sufficient number of waste storage areas that should be integrated accordingly and facilitate the separate storage of recyclable wastes.

The District Council should also be aware of the nearby Water Recycling Site, STW Barley, which is located less than 400m away from the development proposal. The Water Recycling Site is safeguarded under Policy 5 of the adopted Waste Core Strategy and Development Management Policies document due to its important contribution to the strategic network of waste management provision in the county.

Adopted Policy 5: Safeguarding of Sites, states that the Waste Planning Authority will oppose development proposals which are likely to prevent or prejudice the use of land identified or safeguarded for waste management purposes unless alternative or enhanced provision is made for a facility dealing with the equivalent waste capacity or where it can be demonstrated that the need for those facilities can no longer be justified.

The 'Agent of Change' principle (NPPF Dec 2024, paragraph 200) is clear that planning decisions on new developments should ensure integration with existing business such that they do not have unreasonable restrictions placed upon them.

After reviewing the details submitted with the application, and due to the existing residential development surrounding the proposed site, the Waste Planning Authority

does not consider that the proposal will prevent or prejudice the waste management site and therefore has no safeguarding concerns.

Yours sincerely,

Finlay Banks

Planning Officer - Minerals and Waste Policy.
