

Please can I have an expected date update on the application above if possible?

I notice they have asked their next door neighbour to put in a support comment but please may I object to this as their house (Mrs Lynn Brett) is nowhere near the existing garage or window. Mrs Brett does not know me or indeed come round to my residence so im a little perplexed as to how she has formed an opinion on causing issues to near neighbours! Im circa 4 metres away, so its not a valid support to my objection. Their house and view of the garage from their (Mrs Bretts property) is nowhere near said garage and would not affect them! Im very happy for you to come and view the property from my residence so you can clearly see the issue I would have if the council were to grant this permission. No1 Cambridge road have already tried to chop down my bordering trees which would affect their new windows if the garage was extended. Whilst I understand they have the right to chop down anything overhanging onto their property, my trees have been their long before their initial garage. I do not want to cut down the trees. They provide privacy and were here when I moved in. Majority households in surrounding properties and the village have trees.

Mrs Brett has also just installed a swimming pool with a most unsightly plastic poly tunnel over it. Whilst I understand I do not have any grounds to object to this, im conscious that all this planning and building surrounding my home is going to congest the areas surrounding my house (I have very small outdoor space as it is) and devalue my property if planning is granted as it will, as per my initial objection cause lack of daylight and privacy.

Mrs Lynn Brett 2 Cambridge Road North Barley SG8 8HN (Supports)

Given that I am one of the nearest neighbours that could potentially be affected by this application, I would like to confirm that I have no objections. I feel it will enhance the look of the property as well as give significant improvement to useable space, without causing any issues to near neighbours. The increase in the roof height on the garage and addition of velux windows on my side is completely acceptable and I have absolutely no objection. I fully support this application.

Object to raising garage roof and inserting window, would obstruct my daylight and privacy.

Not to mention I feel somewhat bullied as I live on my own.
