To fit

Std & Std Plus Masts 76.1mm

SKU: N/A

Category: Domestic Masts

Description Additional information

The Tennamast Rotator Cage is supplied as standard with some of our masts. It eliminates any side loads on an installed rotator and due to the design, they also void the need for a top bearing.

- Available in 3 different sizes , intended to fit 48.3, 60.3 or 76.1mm diameter mounting poles
- Built in top sleeve has an inside diameter of 50mm
- Standard alloy scaffold pole suitable as an extension (not 2' lightweight pole)
