

Proposed works to be carried out at Burley House, 5 Highbury Road, Hitchin, SG49RW by contractor L&D Window Restoration Ltd.

We, L&D Window Restoration propose to fully restore all windows within the property consisting of:

2x 12 part casement window bays which consist of 4 panes in the top fanlights and a single pane to the bottom casement.

3x double casement windows consisting of 4 panes in the top fanlight and 2 panes in the bottom casement.

1 sash window which is a 6 over 2 pane.

Process and appearance:

The proposed process is to repair, renovate and draught proof the existing casements and sash windows.

We will strip back the paint on all faces and repair the rot. We intend to remove the old glass including router to allow fitting of the new 14mm heritage slimline units. We then glaze these units using dry seal.

We will be keeping all original frames thus keeping the appearance from the roadside exactly the same.

L D Window Restoration

Please contact Lee or Dean if any further information is required on the above works:
